

AIM :- Create a Google Form Quiz with the following requirements:

- a) Convert the form into a Quiz mode with automatic grading.**
- b) Add 5 MCQ questions, each carrying 2 marks.**
- c) Add 1 short answer question that requires manual evaluation.**
- d) Turn ON the setting:**
 - a. Limit to 1 response**
 - b. Shuffle question order**
 - c. Release marks after manual review**
- e. Add a timer add-on (like form presenter) and set up a 10-minute time limit.**
- f. Finally, send the quiz link and view the response**

Section 1 of 2

Section 1: Introduction to AI

This section covers the basic meaning of Artificial Intelligence (AI), how AI works, and examples of AI in our day-to-day life.

This form is automatically collecting emails from all respondents. [Change settings](#)

1. What does AI stand for?

Multiple choice

☐ Artificial Integration

☐ Advanced Intelligence

☒ Artificial Intelligence

☐ Accurate Information

☐ Add option or [add "Other"](#)

☒ Answer key (1 point)

Required

2. What is the main purpose of AI?

Short answer text

3. Which of the following is an example of AI in daily life?

☐ Ceiling fan

☐ Google Maps navigation

☐ Basic calculator

☐ Tube light

?

4. AI systems work mainly using:

☐ Water cycles

☐ Human emotions

☐ Data and algorithms

☐ Physical strength

8. ChatGPT is built on which type of AI model?

☐ Rule-based algorithm

☐ Generative language model

☐ Optical recognition model

☐ Numerical transformer

9. Google Gemini is specifically designed to:

☐ Only generate text

☐ Handle multimodal inputs like text, images, and audio

☐ Create operating systems

☐ Format documents only

14. Which tool is best classified as a "predictive AI tool"?

☐ Google Maps ETA calculation

☐ Notepad

☐ MS Paint

☐ QR Scanner

15. Large Language Models (LLMs) like ChatGPT and Gemini mainly rely on:

☐ Fixed rules

☐ Training on massive datasets

☐ Pre-programmed outputs

☐ Hardware automation
