

Experiment No. 12

Title: Creating “My Chapter Revision Notes” using NotebookLM

- Aim:

To create a NotebookLM project titled “My Chapter Revision Notes” for revising chapters using Artificial Intelligence.

- Objectives:

To understand how NotebookLM works.

To organize chapter notes in one place.

To generate summaries for easy revision.

To use AI for learning support.

- Tools Used:

Google NotebookLM

Internet

Google Account

Laptop / Mobile

- Procedure:

Opened Google and searched NotebookLM.

Logged in using Gmail account.

Clicked on Create New Notebook.

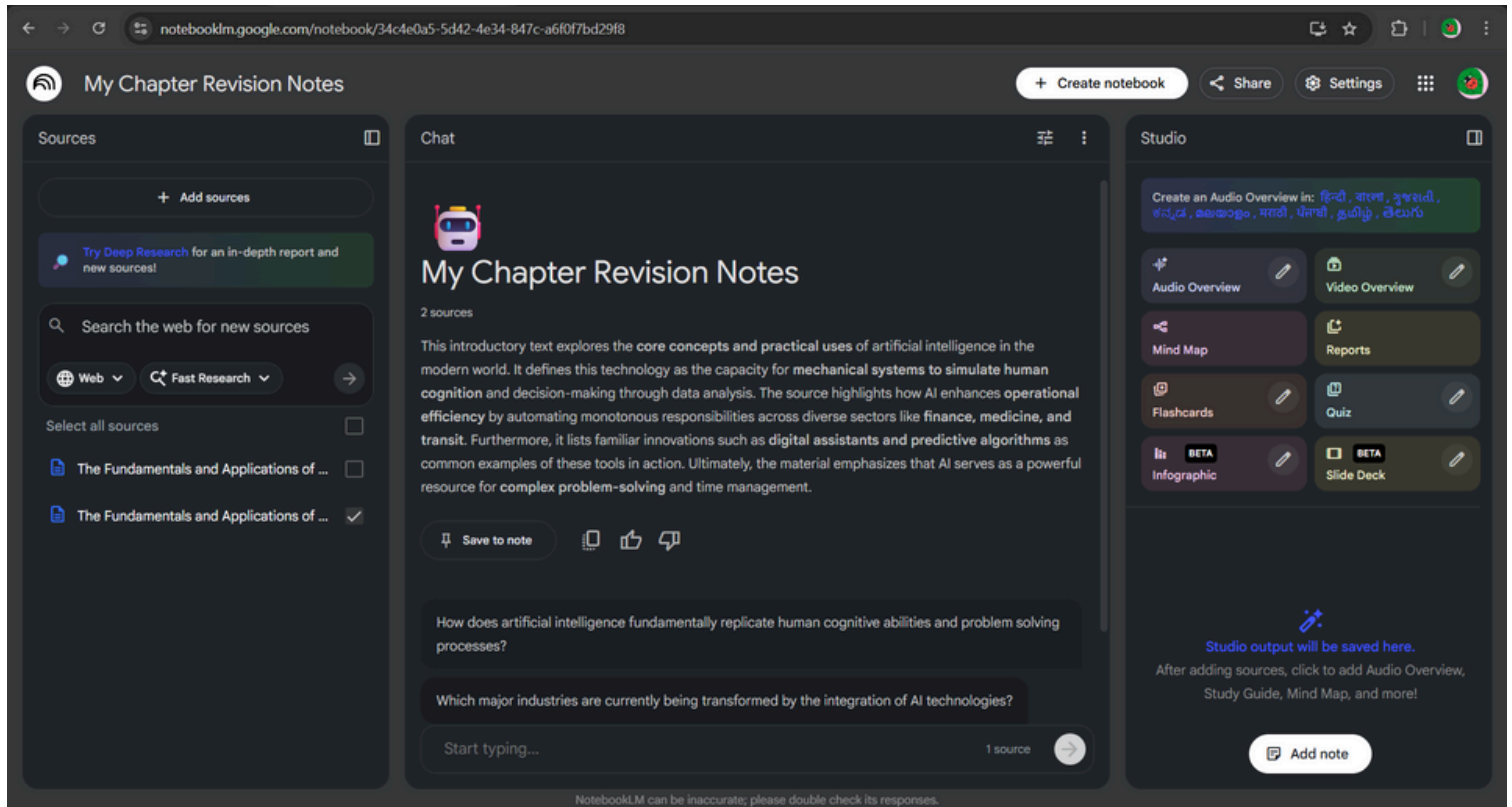

Entered the title “My Chapter Revision Notes.”

Added chapter content as a source.

Used the AI chat to summarize the chapter.

Saved the generated notes.

Took a screenshot of the project as proof.

- Result :-

A new NotebookLM project named “My Chapter Revision Notes” was successfully created. The AI generated summaries helped in revising the chapter easily.

- Conclusion :-

NotebookLM is a useful AI tool for students. It helps in organizing study material and generating revision notes, which makes learning faster and more effective.
